

The AI for Educators Microcredential

The NJIT AI for Educators Microcredential

- *Course 1: Introduction to AI in Education*
 - Objective: Familiarize faculty with foundational AI concepts and explore its potential in educational settings.
- *Course 2: AI-Enhanced Instructional Practice*
 - Objective: Equip faculty with skills to integrate AI into course design, delivery, and student engagement.
- *Course 3: AI for Administrative Efficiency*
 - Objective: Teach faculty to use AI tools to streamline grading, communication, and administrative tasks.

All 3 courses packaged together: \$120

Each course is fully online, self-paced, and approximately 2 hours in length.

In today's rapidly evolving digital landscape, AI is both a transformative technology and a fundamental competency. To meet the need organizations and individuals have regarding this fundamental competency, NJIT offers a non-credit AI for Educators Microcredential.

Everyone who completes all 3 courses for the AI for Educators Microcredential receives a verifiable digital badge to share on LinkedIn and other sites illustrating their completion of the program.

The NJIT AI for Educators Microcredential is managed by the Learning and Development Initiative (LDI), the non-credit division of NJIT connecting people to the skills and knowledge they need to succeed in today's changing world.
