- Course 9. Machine Learning Awareness
- Course 10. Understanding Neural Networks and Deep Learning

All 10 courses packaged together: \$200

Each course is fully online, self-paced, and approximately 2 hours in length.

In today's rapidly evolving digital landscape, AI is both a transformative technology and a fundamental competency. To meet the need organizations and individuals have regarding this fundamental competency, NJIT offers a non-credit AI Literacy Microcredential.

Everyone who completes all 10 courses for the AI Literacy Microcredential receives a verifiable digital badge to share on LinkedIn and other sites illustrating their completion of the program.

The NJIT AI Literacy Microcredential is managed by the Learning and Development Initiative (LDI), the non-credit division of NJIT connecting people to the skills and knowledge they need to succeed in today's changing world.
